

iQ Technology Reports

This list will provide you with details on what information each of our available reports will provide.

Report Name	Report Description	Ability to Automate
Alert Send Summary Report	If you have alerts set in place, this report will provide details of your alerts for a specific time period.	
Assets Checked Out Report	For customers using the Asset feature, this report will provide details for Assets that have been checked out.	✓
Audit Log Report	This report will provide you with details on activity occurring on your account, i.e. updating planogram, adding employee.	
Authentication Errors Report	When an employee uses a machine and any type of error shows on the machine (i.e. employee enters incorrect id number, employee enter in wrong PIN number, out of stock alerts, product restriction alerts, etc), this report shows those types of errors.	✓
Automated Report	Shows a list of what automated reports you have set up.	
Bay Status Report	For customers using Locker machines this report will provide you details regarding the locker bay status (i.e. asset product is ready to pickup, locker bay is under recalibration).	✓
Comparative Usage Report	Breaks down total price usage of machine by week, month, year. Allows you to compare sales/machine usage for time periods.	✓
Employee Item Ageing Report	This report is used with our Locker bay check in/out feature, and provides information on how long an employee has a product checked out for, if the product has been checked back in, in addition to employee and product details.	✓
Employee Rollup Report	Shows each employee who has used the machine, how many items dispensed and value. Doesn't break it down into products.	✓
Inventory Consumption Report	Provides details on number of items dispensed, broken down into product groups.	✓
Inventory Expiration Report	There are two different reports you can run, Expires In ___ Days will show you what products will expire in the next ___ days. There is also an Expired Products report here that will tell you what products expired over the last day, week, month, year.	✓
Inventory Report	There are 2 different reports here you can run. Inventory Total will show all inventory amounts stocked in machines. The Inventory Level report breaks down amount of inventory in each machine and stock levels.	✓
Item Turnover Rate Report	Shows rate at which your products are being vended for a select time period.	
PAR Optimization Report	Provides details on products in machine, to help you know how many items you should have on hand - what to set your par level at.	
Pick List Report	Provides pick list history details for selected time periods. Report shows account, machine, control board S/N, who it was created and accepted by, date and time it was created and accepted, selection #, product, item number and quantity.	✓
